## PROFESSIONAL SUMMARY

---

UI/UX Designer and No-Code Web Developer with 7 years of experience crafting high-performing websites and digital products that move the needle. Specialized in Webflow, Framer and WordPress, with a track record across solar energy, enterprise infrastructure, AI and creative industries, fashion e-commerce, and large-scale event platforms. Builds websites that are fast, conversion-focused, and built to grow businesses, including a site scored at 100 percent Lighthouse performance. Known for turning complex ideas into clean, intuitive digital experiences that generate real results.

## PROFESSIONAL EXPERIENCE

---

### **Absen Renewable Energy** 2025

*UI/UX Designer and No-Code Web Developer | Solar Energy*

- Built a full no-code solar energy platform with a product catalog, solutions pages and a custom solar savings calculator helping users estimate real energy cost savings.
- Integrated an AI-powered chat agent handling customer queries around the clock, reducing support load while qualifying leads automatically.
- Delivered a performance-optimized, mobile-first site with accessible design structured to move visitors from discovery to partner contact.

### **AI9ja Studios** 2026

*UI/UX Designer and Web Developer | AI and Creative Industry*

- Designed and developed the digital platform for a leading Nigerian AI and creative studio, positioning the brand clearly within Africa's fast-growing digital economy.
- Built a visually compelling, high-performance website structured to showcase studio capabilities and convert visitors into clients and collaborators.
- Delivered a mobile-first, SEO-structured experience that supports the studio's growth and visibility across the AI and content creation space.

### **Genius Creators Summit** 2025

*Brand Designer and Web Developer | Event | 1,000+ Guests*

- Designed complete event branding and built the official website for Nigeria's first AI and Content Creators Summit, focused on AI's role in Africa's creative economy.
- Engineered a fast, mobile-first site with seamless registration flows managing 1,000 plus attendees, featuring speaker lineups, agenda, and investor roundtable details.
- Delivered a polished digital identity that positioned the summit as a flagship creative and tech event on the continent.

### **Fencoscope Engineering Technologies** 2026

*UI/UX Designer and Web Developer | Engineering and Infrastructure*

- Built and optimized a website for a trusted engineering and infrastructure firm serving 100 plus clients, achieving a 100 percent Lighthouse performance score.
- Designed conversion-focused booking and inquiry flows that directly generated client acquisition for the business.
- Implemented fast-loading, SEO-structured layouts to strengthen organic visibility and professional credibility.

### **MANLITE Limited** 2026

*UI/UX Designer and No-Code Web Developer | Enterprise Multi-Sector*

- Designed and developed a comprehensive enterprise website for a diversified conglomerate established since 2012, operating across construction, real estate, oil and gas, heavy equipment, hospitality and commercial services.
- Architected multi-sector service pages with clear information hierarchy guiding enterprise clients and partners through each business division.
- Built a professional, conversion-focused digital presence positioned to attract B2B partnerships, investment collaborations and large-scale project contracts.

### Absani Fabrics 2025

UI/UX Designer and E-Commerce Developer | Fashion Retail

- Designed a fashion-forward e-commerce storefront with an editorial shopping experience that showcases collections visually and drives purchase decisions.
- Built product filtering, smooth checkout flows and mobile-optimized layouts that reduced cart abandonment and improved completion rates.
- Applied SEO-structured product pages to increase organic traffic and long-term search visibility.
